ASSEMBLY FOR 157

Nickel or gold plated strap nut
Nickel plated hex nut and washer

High quality, machined copper jack

Nickel plated hex nut, washer, and lock washer

Nickel plated handle

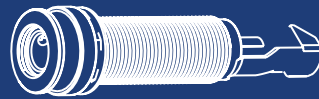

NEW STANDARD ITEMS

1/4" STRAP NUT END-PIN JACKS offer the same trusted quality of a Switchcraft end-pin jack, plus the added functionality of a removable strap nut. This is ideal for acoustic guitar applications, eliminating the need to drill a second hole into the instrument for an output jack. The included handle and cable clamp ensure critical connections are protected, perfect for both OEM pickups or customizations. All hardware is included for easy installation. This design has been available as an OEM special order for decades and is now being released as a standard product for the first time.

INCLUDED STRAP NUT

A durable, copper alloy strap nut is included. Nickel and gold plated options are available

CABLE CLAMP

A high quality cable clamp and included handle protect critical connections

MADE IN THE USA

1/4" Jacks are built in our Switchcraft factory in Chicago to the highest quality standards
